The first language you learn to speak is called your native language. As a baby, you listened to your parents or other people speaking and then told the sounds you heard. Babies seem to be born with a/an (54)..... to learn the language they hear.

Native speakers learn as children to use the right words and say them in the right order without even thinking about it. If English is your (55)..... language, you know automatically that "I going bed" is wrong, but "I am going to bed" is right. If you learn a second language, you have to learn its words and (56)..... That's why learning a second language can be difficult. Young children can learn a new language very easily. If they are among people speaking a different language, they soon learn to speak it (57)..... their native language.

| 56. a) tongues | b) differences | c) feelings | d) rules |
| 57. a) besides | b) by | c) despite | d) through |

Health means much more than not being sick. When you are healthy you say you “feel great”. You are happier and do better work. Health helps you enjoy plays, sports, and parties. It also helps you make friends. Health as a whole includes physical, mental, and social health. All parts of your body must work together properly to give you physical health. Your mind must act normally to give you mental health. You must enjoy being with other people and they must enjoy being with you for social health.

You usually do not think about your body when it works properly. But you worry about your health when you do not feel well. A healthy body protects itself against many illnesses. It can make a cut finger or broken leg as it was before. But it breaks down and stops working well unless **it** receives proper care. Your body can stay healthy only if you supply it with the food and care that it needs. All through the history many persons have worked to **improve** man’s health. Also, the government and a lot of organizations always try to make useful laws to help protect your health.

Questions

- 3
